Hi Mary Anne,

Here is what I additionally added to your comment sheet. Mostly I commented on compensatory mitigation as I am more familiar with that topic than the others.

These comments were created before we received the final mitigation plan but I think they still remain an issue. After seeing the site, I am also wondering whether the acreage of the types of wetlands to be replaced are accurate. Perhaps this touches again upon whether the success criteria/ success standards have been met?

Pictures and memo are coming as soon as I am able to download.

Thanks!

Cheers,
Charissa
